Re: Response to Review Request No. 067-16084
Construction Permit Modification
Plant ID: 067-00058

Dear Mr. Moore :

DaimlerChrysler, located at 3660 North US Highway 31, Kokomo, Indiana, submitted a review request on September 10, 2002. The letter was submitted to request a written response from IDEM stating that stack testing required for shotblast unit No. 6 in construction permit CP 067-9336-00058 is not valid.

The permittee was issued a construction permit (CP 067-9336-00058) on May 7, 1998, which required stack testing for shotblast unit No. 6 because it was permitted as a significant activity with allowable PM emissions greater than 10 pounds per hour. Based on the information provided by DaimlerChrysler during the Part 70 permit review process, it was determined that all the shotblast units at the facility (including shotblast unit No. 6) are well controlled with limited PTE PM less than 2.0 pounds per hour (lb/hr). Therefore, the Part 70 permit did not include any stack testing requirement for these small emitting units.

As explained in the technical support document for the May 21, 2002 Part 70 permit (T067-10704-00058), that permit supercedes the requirements of construction permit (CP 067-9336-00058). Therefore, condition No. 7 (Performance Testing) in the original construction permit (CP 067-9336-00056) which required stack testing for shotblast unit No. 6 is no longer valid.

Questions should be directed to Adeel Yousuf, c/o OAQ, 100 North Senate Avenue, P.O. Box 6015, Indianapolis, Indiana, 46206-6015, or call (973) 575-2555, ext.3252 or dial (800) 451-6027, press 0 and ask for extension 3-6878.

Sincerely,
